## SELECTED SEED CORN

----------------------------------	---------------

A pure white corn of immense size and unusual length. Bulk of crop if on good land will run 11 to 13 inches with occasional specimen 14 or 15 inches. Very productive. We grow quite an acreage of corn and find this the most profitable variety. This seed we selected from our fields last September and is as near perfect as can be found. Will ship in ear or shelled as preferred.
